STP Test Case # ST-2
Requirement tested: FR-8.1
Determination: UNSUCCESSFUL

Setup:

1. **Open the Chrome browser on Windows OS**
2. **Navigate to front-facing Moxie server (http://moxie.cs.oswego.edu:7000/)**
3. **Execute test**

Execution:

1. **Load the moxie server**
2. **Inspect if the load event that was triggered (not shown)**

Expected Result:
1. A log entry is created each time the home page is loaded.
2. The log has information such as load event triggered, timestamp of the event, and event status

STP Test Case # ST-2
Requirement tested: FR-8.2
Determination: UNSUCCESSFUL?

Setup:

1. Open Safari browser on MacOS.
2. Navigate to the front-facing Moxie server (http://moxie.cs.oswego.edu:7000/)
3. Log in as a student user.
4. Generate a notification by adding a task or submitting a report.

Execution:

1. Load the moxie server
2. Turn the wifi off on my laptop
3. Refreshed the page

Expected Result:

1. If homepage data fails, a log should be generated.
2. The log has information such as event type triggered, failure reason, timestamp of the event, and event status

Bug/Defect # Defect

Severity: Low

STP Test Case # ST-2

Build/Release #?

Steps during test:

1. **Open the Chrome browser on Windows OS**
2. **Navigate to the Homepage on the Moxie website**
3. **Inspected for a load event to be triggered**

Description:
During FR-8.1/ST-2, when I opened the home page and refreshed it a few times, I didn't notice any load event triggered or anything logging.

Potential Cause (if known):
Not too sure.

Screenshot shown above

Bug/Defect # Defect

Severity: Low

STP Test Case # ST-2

Build/Release #?

Steps during test:

1. **Open Chrome browser on MacOS**
2. **Loaded the home page**
3. **Turned off the wifi connection on my laptop**
4. **Refreshed**
5. **Turned the Wi-Fi back on**
6. **Inspected home page**

Description:
During FR-8.2/ST-2, I turned off the Wi-Fi and saw the standard Chrome message that I can't access the website without an internet connection. When I turned it back on, it didn't log anything of an error or disconnection

Potential Cause (if known):
Don’t know
